EDUCATION

COMSATS University Islamabad

Bachelor of Science in Computer Science (BSCS) — 6th Semester

Islamabad, Pakistan

2023 – 2027

Relevant Coursework: Data Structures & Algorithms, Design and Analysis of Algorithms, Object-Oriented Programming, Computer Organization & Assembly Language, Advanced Database Systems, Operating Systems, Software Engineering,

TECHNICAL SKILLS

Programming Languages: JavaScript, Dart, C++, HTML5, CSS3

Frontend Development: React.js, HTML, CSS, JavaScript, Responsive Web Design

Backend Development: Node.js, Express.js

Databases: MongoDB, Supabase

Tools & Platforms: Git, GitHub, VS Code, REST APIs, Vercel

Core Competencies: Full-Stack Web Development, Database Design, Problem Solving, Version Control, API Integration

PROJECTS

Clearance & Degree Issuance System | *React.js, JavaScript, MongoDB* 2026

- Engineered a digital workflow management system to automate student clearance and degree issuance processes, reducing approval turnaround time by an estimated 70%.
- Implemented a multi-stage approval tracking system with role-based status views, enabling staff to process requests across 5+ departments from a single dashboard.
- Designed a centralized record-management interface that cut lookup time from minutes to seconds through searchable, filterable student records.

Committee Management System | *React.js, JavaScript, MongoDB* 2026

- Developed a centralized web application for managing committees, member assignments, meeting coordination, and administrative records through an intuitive interface.
- Built role-based access controls and a meeting-scheduling module that reduced manual coordination effort by ~50% in testing.
- Improved coordination, transparency, and information accessibility through a streamlined digital platform.

PROFESSIONAL PROFILE

Motivated Computer Science undergraduate with a strong foundation in software engineering and modern web development. Experienced in designing and developing responsive web applications using React.js, JavaScript, Node.js, and MongoDB. Passionate about building scalable solutions, learning emerging technologies, and applying analytical problem-solving skills to real-world challenges. Committed to continuous growth and contributing effectively within collaborative development environments.
